

*****Announcement of Award*****

THE CENTER FOR DIGITAL GOVERNMENT AND EDUCATION
Awarded
THE CRITICAL BUSINESS TECHNOLOGY ASSESSMENT PROGRAM
Winner in the Government Internal Category
In
BEST OF THE WEB

The Critical Business Technology Assessment Program was a winner in the Government Internal Category at the 10th Annual Best of the Web ceremony held in Las Vegas on Thursday, September 29, 2005. Over 450 applicants from around the country competed for awards in a variety of categories in government and education Web achievements. CBTAP was one of five winners in the Government Internal category (In all there were 31 winners in the four Government Achievement categories). Over all, 18 different jurisdictions (states, cities and counties) were represented at the award ceremony. Other Nevada participants included, the Health Division's Virtual Network, which was recognized in the Government to Government Category, and a First Place for Truckee Meadows Community College in the Higher Education Web Site category.

CBTAP is a statewide online survey creating an electronic repository of information about the State's critical business functions and their supporting applications and technologies. It performs a business impact assessment, the first step in disaster recovery planning. The website, <http://doit.nv.gov/cbtap/>, contains both the CBTAP Web Survey application as well as a full set of supporting documentation, training materials and examples. It was conceived and developed by DoIT's Planning Unit with support that deserves acknowledgement:

- ♦ Antonio Leal - designed, built and maintains the CBTAP Web Survey; CBTAP Administration
- ♦ Jenet Hensley – CBTAP project manager, administrator, report developer and principal trainer
- ♦ Rupert White - key participant in defining the CBTAP concept and requirements
- ♦ Barbara Middleton - developed CBTAP Online Help; created concept for CBTAP information website; initial trainer
- ♦ Linda DeSantis and Judy Walker - built and maintain CBTAP information web site
- ♦ Shawn Curby - defined hosting support services
- ♦ Patrick O'Brien and Ryan Madison - created and continue to maintain and support our virtual Suse Linux hosting environments for CBTAP
- ♦ Jim Brady - monitoring and diagnosis of possible performance problems
- ♦ Dave Miller - CBTAP business program manager and team lead
- ♦ Geno Fitzgerald, Susan Meyer, Wanda Cox – CBTAP agency support
- ♦ INFOSEC - Security Consultation
- ♦ Sherrie McGee/Alisanne Maffie – Submitted CBTAP to the Best of the Web competition
